Wendover Air Force Base,
Ice & Cold Storage Building
(Building No. 2229)
HABS NO. UT-125-~~2~~ AJ
Page 1

This is one of several structures built in 1943 along a spur line of the Western Pacific Railroad. This small building (642 square feet) was built for \$1,500.00

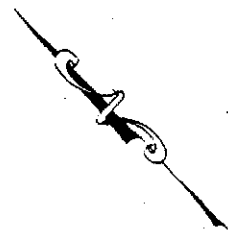

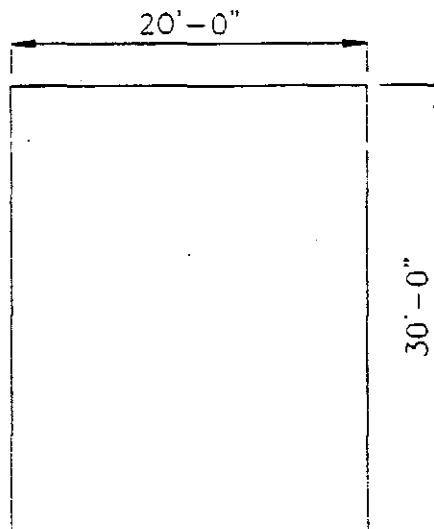

The building is a wood frame, flat-roofed structure built on timber beams sitting on concrete block piers. All told, there are four beams, each borne by 3 piers. The wall sheathing is diagonal boards once covered by tarpaper rolls (now gone). The roof has asphalt roll roofing. Only the west wall is penetrated by openings: a single door and small, square windows. Connected to the building along the east wall is a concrete slab-on-grade, to allow delivery access to the door. The interior of the 20-foot-by-30-foot building has no equipment save incandescent lights.
